

Cloud and Process Automation Plug-in Software Tools

Reduce Manual Labor and Improve Process Efficiency

Automate more cost-effectively with cross-process integration that leverages VMware's orchestration flows, cloud maps, adapters and plug-ins. Reduce your dependency on technical resources to understand the configuration of process and data structure, and integration protocols with out-of-the-box sample workflows.

VMware and BMC

- **BMC Remedy ITSM and BMC Atrium CMDB Plug-in for VMware® VMware™ Orchestrator™:** Enable process automation and data integration between BMC IT Service Management and VMware vCloud.
- **BMC BladeLogic Plug-in for VMware® vRealize™ Orchestrator™:** Automate server management, provisioning, and configuration effectively and efficiently.
- **BMC RemedyForce Plug-in for VMware® vRealize™ Orchestrator™:** Extend the capabilities of BMC's modern IT Service Management with VMware virtualization.

VMware and HP

- **HP Operations Orchestration Plug-in for VMware® vRealize™ Orchestrator™:** Automate multi-domain processes effectively and efficiently with bi-directional HP OO plug-in for Orchestrator.
- **VMware® vCloud Director® Extension Pack for HP Operations Orchestration:** Accelerate the provisioning of data centers and deployment of workflows in minutes by integrating between HP OO and VCD.
- **HP Service Manager and HP uCMDB Plug-in for VMware® vRealize™ Orchestrator™:** Bridge the gap between HP IT Service Management and VMware virtualization
- **HP Database and Middleware Automation Plug-in for VMware® vRealize™ Orchestrator™:** Automate database provisioning and configuration effectively for standalone and clustered application-ready databases.
- **HP Server Automation Plug-in for VMware® vRealize™ Orchestrator™:** Achieve server automation across organizational silos with cross-process integration.

VMware and IBM

- IBM SoftLayer Server Automation Plug-in for VMware® vRealize™ Orchestrator™: Simplify the integration and reduce the time needed to manage the physical and virtual servers in a data center throughout their lifecycle

VMware and Microsoft

- Microsoft System Center Integration Pack for VMware® vRealize™ Orchestrator™: Extend Microsoft's workflow management solution for VMware virtualization

VMware and Google

- Google Cloud Automation Plug-In for VMware® vRealize™ Orchestrator™: Simplify the integration and reduce the time needed to manage workloads in the Google Cloud

VMware and ServiceNow

- ServiceNow Plug-in for VMware® vRealize™ Orchestrator™: Extend ServiceNow's ITSM solution for VMware virtualization

VMware vRO, vRA and NSX Implementations

- VMware vRO, vRA and NSX Implementation Services: Tech Data offers VMware vRO / vRA and NSX Global Implementation Services with our VMware certified staff. Contact us today for additional details.

Enable hybrid cloud with our Integration tools. Contact us today!
